Recommended Applications

- Residential roof top systems
- On-grid utility systems
- On-grid commercial systems

Suntech's technology yields improvements to BSF structure and anti-reflective coating to increase conversion efficiency

Unique design on drainage holes and rigid construction prevents frame from deforming or breaking due to freezing weather and other forces

The panel provides more field power output through an advanced cell texturing and isolation process, which improves low irradiance performance

Suntech was named Frost and Sullivan's 2008 Solar Energy Development Company of the Year
